1 Apologies

None.

2 Presentation

2.1 Xiuquan Wang

- Demonstrate the elementary backend structure as discussed in last meeting (using Laravel as the framework).

2.2 Junhong Zhu

- Demonstrate the draft UI prototype as mentioned in the last meeting.

2.3 Xuankai Feng

- Demonstrate the status of survey about UniMingle's distribution, and analyze current results so far.

2.4 Functional requirements and Presentations in Last Meeting

Discussion on technology stacks selections about UniMingle, including both front-end and back-end.

Discussion on expected major functional modules about UniMingle.

2.5 Problems and solutions

Problems: We have to discuss about the UI style of UniMingle based on the draft finished by Junhong.

Solutions: Every team member will join in discussion on this issue and make a concurrent decision.

3 Requirements Elicitation

3.1 Functional requirements should be discussed further according to the survey result.

3.2 Discussion on materials that should be presented in the pitch presentation on late March. The result of survey can be a supportive evidence for deciding functional modules.

4 Other Issues

- Code and documentation management.
- Git branches management.

Note: Next meeting will be held on 23rd March 2019
